Meeting**

Lunch

Departure of Participants

Dear members of the KRING van Zeewerende Ingenieurs.

A new year with a new chairman for our next meeting will bring us in Poland.

After our trip in the Wadden area and especially on the island of Terschelling it was a great pleasure to be invited to this eastern country at the Baltic Sea. A few years ago we were able to visit this country and many of us have very good memories about it. Not only the different coastal problems and solutions and a very interesting boat trip remind us of a very successful meeting, also the lectures of a number of near by interests of the coastal zone were impressive.

The international problem of climate-change has worldwide led to the first ideas of the coastal policy for the next centuries. It is for that reason that my expectations for the next meeting in Poland are very high. I am sure that our Polish colleagues and friends are able to offer us - again - a very interesting program.

To support our KRING as the platform of one of the most experienced coastal knowledge movements in Europe I invite you all for our next meeting in September.

With kind regards,

Ing. Adrie Provoost
Waterschap Zeeuws-Vlaanderen

Dear Friends united by the ideas of KRING van Zeewerende Ingenieurs!

This year, as a Head Director of Maritime Office in Szczecin, I will have the great honour and pleasure to welcome you at the meeting of KRING in Pogorzelica, the small but picturesque village on the western coast of Poland.

The privilege and also the challenge of playing host to you in our country will be even greater for us by the fact, that the Maritime Office in Szczecin is the organizer of KRING's gathering for the very first time.

During these three September's days, which we would spend together, most of all we would like to show you the peculiar character and differentiation of Polish coast area and the solutions we practically apply in its protection. In common we will see not only the beautiful shore landscapes but also the examples of our activity in saving them from the grim force of the Baltic Sea and nevertheless from the human output.

I hope you will find 2009 KRING's agenda interesting, profitable and worth to remember. Looking forward for our meeting,

Ing. Andrzej Borowiec
The Head Director
of Maritime Office in Szczecin
